Motion by Lyons, seconded by Kirk to approve and sign the Maintenance and Repair Loan while the SRF loan is

still available. All ayes.

Department reports: Mayor informed everyone that he had street lights donated to the city that will fit the older

fixtures. LEDs and eyes will still need to be purchased. Kirk threw the idea around about removing the tree stumps around town. Kirk also mentioned getting rid of using cold patch and using cement to replace the pot holes around patch and using cement to replace the pot noies around town. Hoskinson wanted to thank everyone for the donations to the pool. Items on the pool wish list were all donated within 24 hours. Library gave their report and stated they received \$4700 for LED lighting at the library. The Fire Department gave their report and stated that they have received several grants. This money will be used to replace the grant doors, purchase new radius and also replace the garage doors, purchase new radios and also purchase a power cot.

Motion by Kirk, seconded by Launderville to adjourn. All

Drinking water, including bottled water, may reasonably be expected

necessarily indicate that water posed a health risk. More information about contaminants o r

potentia I hea Ith effects can be obta ined by calling the Environmenta I Protection Agency's Sa fe Drinking Water Hotline (800-426-4791).

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno -compromised persons

-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advic e about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800 426-4791).

-426-4791).
If present, elevated levels of lead can cause serious health problems especially for pregnant women and young children. Lea d in drinking water is primarily from ma-

trials and components associated with service lines and home plumbing. JEFFERSON WATER
DEPARTMENT is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing.

rials used in plumbing components. When your water has been sitting for several hours, you can

minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes be-

fore using water for drinking or cooking. If you are concerned about lead in your water, y ou may wish to have your water tested. Information on lead in drinking water,

testing methods and steps you can take to minimiz e exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead.

ADDITIONAL HEALTH INFORMA-

TION While your drinking water meets

EPA's standard for arsenic, it does contain low levels of arsenic. EPA's standard balances t he current understanding of arsenic's possible health effects against the costs of re-moving arsenic from drinking water. EPA continues to

research the health effects of low levels of arsenic, which is a mineral known to cause cancer in humans at high concentratio ns and is linked to other health effects such

as skin damage and circulatory probas skin damage and circulatory problems.
